## UV DIRECT PRINT

### COMPACT FLATBED PRINTERS

Modico Graphics is an authorised Mimaki dealer in several European countries. Our own brands such as the compact Neonjet printing system are economical entry-level models for UV flatbed printing. By the way: Most of the inks we sell are EN71-3 certified and thus meet the strict EU guidelines for children's toys.

### LARGE FORMAT FLATBED PRINTERS

With FUJIFILM and its current flatbed series Acuity Prime, we have another top manufacturer in our portfolio. Together with the large format Mimaki JFX systems, we can offer solutions for any plate size and print speed.

## ROLL PRINTERS

### UV / SOLVENT / SUBLIMATION

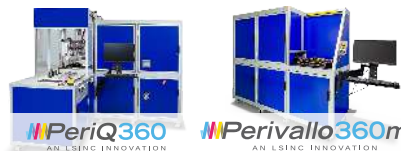

Whether it's a roll printer or a print & cut system - we carry various series and models from the market leader Mimaki - from 75 cm to 3.2 metres printing width. And the entire range of consumables, inks and spare parts.

## PLOTTERS

Mimaki cutting plotters are regarded in the signmaking market as all-rounders with impressive quality and extremely robust construction. The drag-knife technology guarantees a quality of film cutting that is unparalleled on the market. Register mark recognition for cutting printed film is standard.

## UV CIRCULAR PRINT

Modico Graphics is the distributor in Europe for digital rotary printing systems from US manufacturers LSINC and IDS. Europe. With their spectacular developments and special ink series from Marabu and INX, we are raising the durable printing of bottles, jars and other round bodies to the next level.

## DTF DIRECT TO FOIL

The complete system for the reliable, industrial production of DTF transfers. Made in Germany, presented by Modico Graphics. Packed with innovations, the Modijet DTF models enable smooth workflow from print to finished transfer product.

## LASERSYSTEME

Together with our strong partners, we offer various GCC laser systems from compact devices to large systems. We have the right equipment for laser engraving and cutting.

Modicut DFS+, the laser cutter with feeder, automated sheet transport, register mark detection and delivery for contour cutting of labels and foils, offset and digital print sheets.

Specialist Nanosec Automation implements high-tech laser systems. From high-precision 3D lasers in the automotive sector and cobots to glass finishing and medical technology.

## SERVICE

Whether it's a demo appointment, service, repair or questions about software and application: our technicians support you via remote maintenance, in our showrooms or on site.

NOTICE: Not all products shown may be available in all modico regions.

## STAMPS

Unrivalled in its versatility for years: the original Modico stamp system. In just one minute a stamp is produced - simple, fast and environmentally friendly.

## LAMINATION

Applikator 3000

MISTRAL 1650

Application tables and roller laminators from the French quality manufacturer KALA are sold throughout Europe. Mimaki laminators and KeenCut cutting solutions round off our range.

## PRETREATMENT

With our pretreatment expertise, we achieve the best possible adhesion on all surfaces - whether with degreasing, flame treatment, Pyrosil, Corona and Plasma or our range of special primers.

## FINISHING

CandleShield

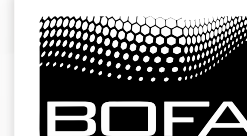

CandleShield protects UV-printed candle designs: scratch-resistant, robust and completely inconspicuous. Best used in conjunction with our circular printing solutions from LSINC, IDS, Mimaki and Neonjet.

## EMBROIDERY

As a Tajima specialist dealer, we carry state-of-the-art embroidery machines for workwear, towels, shirts, caps and more. Like the new Tajima TMEZ, which reduces distortion, creasing and thread breakage.

## ABSAUGUNG

Die Luftreiniger

Thanks to our own warehouse we can respond quickly to your needs for extraction systems and replacement filters. Modico Graphics carries the entire range of the world market leader BOFA and other manufacturers.
